

IN THE SPECIFICATION

Please replace the paragraph beginning on page 15, line 21 with the following amended paragraph:

The information reproducing method according to the first embodiment is implemented in a situation where a plurality of users have recorded the same programs in information reproducing terminal devices 1, and an arbitrary user in a community specifies a program to be viewed by the plurality of ~~user~~users to generate schedule data which is delivered to the remaining users such that the reproduction of the same image is started at a specified time by information reproducing terminal device 1 of each user based on the schedule data.

Please replace the paragraph beginning on page 26, line 1 with the following amended paragraph:

In the third embodiment, since the schedule data includes the unattended-recording data for the specified program data reproducing terminal device 1 (which has recorded the schedule data) the device sets for unattended recording of the specified program, and starts reproducing the program at the specified time pursuant to the schedule data.
